slow

Thu, 11/04/2010 - 09:02 — alceste
I am now evaluating the product, and find it in general well-conceived and helpful.

However, it often slows down work considerably

I suspect the software updates its databases too often so that if i merely assign a task to a project then want to close down the window involved, it takes several seconds before the window actually closes.

Another issue: in the Explorer graphic window, the View button appears to do nothing at all, and I always see the links graphically. In particular the files appear as a complex bunch of boxes linked to the center, with no possibility to sort [details]. is this just me, or is there some other setting to set?
