

Recurring tasks and Toodledo

Mon, 01/03/2011 - 10:55 — Chris

The Organizer add-in does not support recurring tasks as set by Toodledo. However, recurring tasks designated in Outlook are supported.

When you create a recurring task in Outlook, it sync's with Toodledo. Once the Outlook task has been completed via Outlook, it should create a new task and consequently sync a new task to Toodledo.

If that task is completed via Toodledo or an application connected to Toodledo, perhaps someone can tell me what happens. If Outlook doesn't automatically create a task, that's a bug to be fixed.

Please let me know your feedback.
