Reading task from linked Sharepoint lists

Thu, 01/20/2011 - 21:32 — johne
Hi,

We have a number to Sharepoint department related lists that I sync with Outlook. This created 'Other Tasks' in Outlook. I can open these synched tasks and assign a project or focus, but they don't show up in the Project Explorer or Organiser Pane.

Can you please advise if this is possible?

Thanks
John
