Mobile Synchronization

Fri, 03/04/2011 - 11:19 — dhowie

On the mainpage for the Organizer, a poll has been running for a considerable amount of time that references the possibility of the development of the ability to synchronize Organizer with mobile devices. Is that ability close to being a reality in any upcoming Organizer version?

A free beta-app I've been using on my Android-based smartphone has expired, and before I pay for the full version, I'd like to know if Ceptara has something coming soon. I'd hate to pay for an app now that I'm going to replace in the near future with a Ceptara Organizer app (yes, it's only $6, but I'm cheap).
