What is the best way to work with subprojects ?

Thu, 03/24/2011 - 04:21 — hmenning

I like to work with a couple master projects and have sub projects within these master projects.

For example. I have a project - Development new software. Within that project i got a sub project - release Q1, release Q2 etc.

I implemented this in the Organizer add-on, by creating 5 seperat projects:

Development new software

Release Q1 etc.

I keep track of all actions on the current developments in Development new software and specific items / information for the to be planned release in Q3 i connect to the seperate project Release Q3...

Is there a better way, because I corrently see a large grow of the number of projects i got.
