project explorer request

Fri, 03/25/2011 - 03:42 — jupp25

the project explorer gives me a good and quick overview for projects and details.

when i`m working within tasks or the calender i sometimes need to look up information and for that i have to go all the way through the project explorer, projects...

it would be great to open the assigned project from within the task or any other object and just get the information to the specific project
