Request extra filter options

Fri, 05/20/2011 - 02:49 — hmenning

I like the fact, that all information about a project is centralized in the project explorer.

But... after a time the amount of information in a project folder starts to look un-organized.

With the current filter it is possible to filter on active or all tasks. It would be nice if the filter could have the posibility so filter on, for example: I only need to see al task (and don't have to see the e-mails) or.. the other way around, I only want to see the mails...

Maybe it is an option for a future release.. or is there a other way to get what I want ?
