Six Sigma in Purchasing

Thu, 08/28/2008 - 09:45 — Chris

I will be delivering a **talk** at the next AmCon **show** in Bellevue Washington on February 19 or 20, 2008. I've given this talk a number of times, so please stop by and say hello if you've found the topics interesting and/or useful.

Briefly, the talk is centered on how to use a few six sigma tools in managing your supply chain. For example, we use a perceptual map in assessing what class a supplier might fall into in the qualification process, or how to use the Voice of the Customer in describing your Critical to Quality metrics in supplier performance monitoring.

If you're interested in attending, please go **here** to register. I look forward to seeing you there.

- Product Realization [1]
- Quality Excellence [2]
- Supply Chain Management [3]
