

How to make the ceptara oragnizer work properly on outlook 2010

Tue, 07/12/2011 - 03:13 — matthieu.petite

Hello all,

After couple of hours spending time to find a way to make ceptara my organizer pane work properly on outlook 2010 I found this solution:

- close outlook
- Open c:\temp\myorganizer.htm file
- replace line 19 <param name="View" value="Day/Week/Month View with AutoPreview">
by this : <param name="View" value="Calendar">
- replace line 44 <param name="View" value="Simple List">
by this : <param name="View" value="Tasks">
- save the file
- re open outlook and now your Organizer should be fixed.

One more tips for developers, MS change the view name on the active x control. The new value is now Calendar and Tasks.

Hope it helps,
