

performance

Mon, 05/21/2012 - 22:43 — svenna
Hi,

Have you/anyone checked the performance of the plugin?

My Outlook 2010 has started to have performance problems where several actions takes many seconds to do, saving a task takes 5-10 seconds as an example.

Before i start a bigger investigation i just wanted to check if there is any performance problems noticed with the ceptara organizer when the amount of mail/tasks etc increases?

Thank you for this wonderful plugin btw!
