

organizer wont start after update

Wed, 06/27/2012 - 05:50 — jupp25
hi chris,

i hope you can help.

after installing the new update the organizer wont start. first i had errors with something like "posaddin2007"

after deleting all addins the organizer wont start, just without an error.

i tried deleting den "2.0" folder, because i could not re-install. installing now worked, but the organizer still would not start.

i uninstalled everything i could think of and re-installed/fixed outlook itself and installed the organizer again, but still wont start and the addin always goes in "inacitve" state.

do you about problems with the organizer and the funambol client?

any ideas?

greet from germany

chris
